OTHER INFORMATION OF BERNARDO HERNANDEZ, OF HAVANA, KNOWN BY "BENNY", ON MILITARY INTELLIGENCE

Proclaims having knowledge that at the place known as "La Puntilla", at the mouth of the river Almendares, there exists large quantities of anti-air batteries, among them "4 barrels", and other major types.

They have also observed large quantities of anti-air artillery in the "Bacuranao" development, along the coast, in front of Villanueva University. This same type has also been observed along the coast of Baracoa, Barilovento development, where they have "4 barrels" and other pieces of major size.

At the Hotel Nacional of Havana, they changed the "4 barrels" anti-air to long range anti-air cannons.

Between the towns of Bahia Honda and Cabanas, there is a Tank Camp where it is calculated there are about 300 tanks of various sizes.

He professes to have knowledge that on the road

which goes from La Rotonda of Guanabo to the road to Guanabacoa, there is a Russian Camp where there is a large amount of "rockets". It is believed they are long range by their size; since they did not see this size at the last military parade they had in Havana.

On the 24th of Jan 64, 20 trailers with this type of cargo were seen on this road; this took place around dawn.

Assistant: Below I list the various acts of sabotage committed by us in Havana province:

1. In the "Josefita" Central in Nueva Paz, Havana province, a piece of steel was put into the sugarcane grinder causing great damage.
2. In the zone of Nueva Paz, Palos and San Nicolas de Bari, in Havana province, they caused 10 rows, causing large losses; still this is the zone of the island where in the month of February they produced 18 fires in the sugarcane fields. In the zone of San Nicolas, Alquizar, Guines and Melena del Sur, also in Havana province and lastly, between the 2nd and 3rd of March, they carried out 5 fires between San Nicolas de Bari and Nueva Paz, destroying more than 300,000 arrobas of sugar cane according to the proper local road authorities.
